

H1N1 Flu Vaccine: It Takes Two

Children need two doses of the 2009 H1N1 flu vaccine!

Children 6 months through 9 years of age need 2 doses of the 2009 H1N1 flu vaccine.

The second dose of the 2009 H1N1 flu vaccine is given about 3 to 4 weeks after the first dose.

Getting 2 doses of the 2009 H1N1 vaccine is the best way to prevent this flu.
