

WILD BIRDS CAN SPREAD AVIAN INFLUENZA

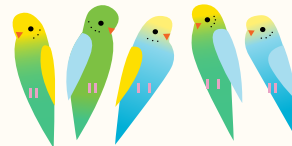

Avoid direct contact with wild birds

People should avoid direct contact with wild birds and observe them only from a distance

Wild birds can be infected

Wild birds can be infected with avian influenza viruses even if they don't look sick

Avoid unprotected contact

Avoid unprotected contact with domestic birds such as poultry that look sick or have died

Do not touch

Avoid surfaces that may be contaminated with saliva, mucous or feces from wild or domestic birds

Wash your hands

Always wash your hands thoroughly with soap and water after contact with birds
