 PHL Contact Name: \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_  
 Pre-treatment serum  Gastric aspirate  Stool/ Food item  Wound aspirate/biopsy
- Explain to physician that the only antitoxin available is the Heptavalent Botulinum Antitoxin under an IND Protocol.**  
 They will need to read the protocol and directions that come with the antitoxin, obtain patient or family consent and fill out the requested forms and send forms directly to CDC.
- Approve antitoxin release from the CDC quarantine station at LAX, (310) 215-2365.**  
After-hours - call CDC Emergency Operation Center (EOC) at (770) 488-7100. Explain that you are from California and need to be connected to someone at LAX Quarantine Station. For suspected foodborne botulism, notify CDC EOC at this time.  
 Quarantine Station Contact Name: \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_  
 Treated with heptavalent antitoxin?  Yes  No Date started: \_\_\_\_\_
- For suspect foodborne botulism,**
  - Request assistance from Environmental Health Food & Milk with home inspection at (626) 430-5400.**  
 EH Contact Name: \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_
  - Interview the case/ family regarding any risky food exposures.**
  - Whenever possible, go with EH-Food & Milk to search for potentially contaminated food for testing.**
