

The Affordable Care Act: What Californians Should Know

May 2010

Signed into law in March 2010, the federal legislation known as the Affordable Care Act is designed to make it easier for millions of Americans to obtain, pay for, and keep the coverage they need. After the law is fully implemented in 2014, estimates are that 94 percent of Californians will be insured, either through their employer, a new exchange market, or expansions to public benefit programs. This guide is intended to orient California consumers to the coming changes in the coverage landscape, the key reforms the law contains, and what their options will be once all the pieces are in place.

Highlights of the Law

Bars insurers from:

- Denying coverage because of pre-existing medical conditions.
- Dropping the coverage of people who become sick.
- Charging higher premiums because of health issues.

Requires large employers to:

- Provide health insurance, or be subject to potential penalties.

Encourages small employers to:

- Provide coverage in exchange for tax credits.

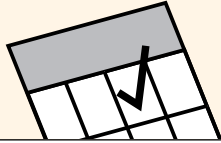

Requires individuals to:

- Obtain health insurance or pay a penalty, unless they qualify for certain exemptions.

Allows parents to:

- Extend their health insurance to children up to the age of 26.

What if I'm sick and need coverage before 2014, but no insurer will sell it to me?

Uninsured Californians with health problems may qualify for insurance through a temporary, state-run program at standard market rates, with no lifetime or annual payout limits. Contact the California Major Risk Medical Insurance Program, (800) 289-6574 or www.mrmib.ca.gov.
